

RUBY LUGDUNUM

JUNE 20th, 2013

Meet the Ruby international community in Lyon

We are very proud to announce the **3rd Ruby Lugdunum conference**. Ruby Lugdunum, aka **RuLu**, is following its proven approach: talks relevant to current topics (in English), perpetual hacking, awesome party, great atmosphere, long enjoyable networking breaks and lovely venues.

On Thursday June 20th, 200 attendees will enjoy a whole day of single-track sessions, socialize during lunch and regular breaks, and enjoy a great party at night.

They come from multiple background (developers, designers, entrepreneurs, hackers) from France, Europe and other countries, but always share **the same passion for Ruby**. Some of them may be open to new employment opportunities.

On the day after, Wednesday June 21st, we will have **workshops** hosted by our sponsors and developers of some of the most influential projects in the Ruby community.

Get involved, you want Ruby developers to associate your brand to one of the most magical experience they ever had at a French Ruby conference!
